

NAME
2-10-2 CLASS S-1

STOCK NO.
5099

PRODUCTION
1966

5099B Baltimore & Ohio

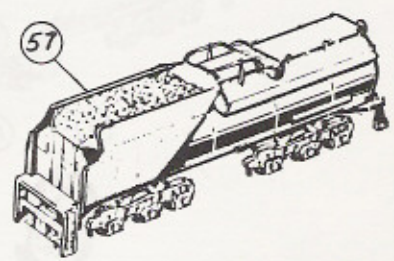

"Big Sixes", they called them out on the Cumberland, Pittsburgh, New Castle and Toledo divisions. "Big," because they were big, and the numbers always started with the number six; that is until 1956 when the few left were changed to the 500 series. The first Santa Fe was built for the B & O in 1914.

Because of sharp curves many locomotives were built without flanged center driver. Our model has an extra flanged center driver for model railroaders wishing to convert to an all-flanged model. Length with tender 15"

47	6200	6200
	6202	6202
	6204	6204
